Forward-looking Statements

Statements in this presentation that are not historical in nature, including those concerning the company's current expectations about its future results, are "forward-looking" statements as defined in Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. Forward-looking statements are identified by words such as "may," "should," "expects," "provides," "anticipates," "assumes," "can," "will," "meets," "could," "likely," "intends," "might," "predicts," "seeks," "would," "believes," "estimates," "plans," "positions," "continues," "goals," "guidance," or "outlook," or similar expressions. These forward-looking statements reflect the company's current expectations about future requirements and needs, results, levels of activity, performance, or achievements. Some of the factors that could cause actual results to differ materially from the forward-looking statements contained herein include, without limitation: failure to achieve expected utilization rates, billing rates, and the necessary number of revenue-generating professionals; our ability to realize the expected benefits and potential opportunities of artificial intelligence (AI); inability to expand or adjust our service offerings in response to market demands; our dependence on renewal of client-based services; dependence on new business and retention of current clients and qualified personnel; failure to maintain third-party provider relationships and strategic alliances; inability to license technology to and from third parties; the impairment of goodwill; various factors related to income and other taxes; difficulties in successfully integrating the businesses we acquire and achieving expected benefits from such acquisitions; risks relating to privacy, information security, and related laws and standards; and a general downturn or volatility in market conditions, including as a result of current global trade tensions and/or tariffs. These forward-looking statements involve known and unknown risks, uncertainties, and other factors, including, among others, those described under "Item 1A. Risk Factors" in Huron's Annual Report on Form 10-K for the year ended December 31, 2025 that may cause actual results, levels of activity, performance or achievements to be materially different from any anticipated results, levels of activity, performance, or achievements expressed or implied by these forward-looking statements. The company disclaims any obligation to update or revise any forward-looking statements as a result of new information or future events, or for any other reason.

Use of Non-GAAP Financial Measures

In evaluating the company's financial performance and outlook, management uses earnings before interest, taxes, depreciation and amortization ("EBITDA"), adjusted EBITDA, adjusted EBITDA as a percentage of revenues before reimbursable expenses, adjusted net income, adjusted diluted earnings per share, free cash flow and free cash flow yield which are non-GAAP financial measures. Management uses these non-GAAP financial measures to gain an understanding of the company's comparative operating performance (when comparing such results with previous periods or forecasts). These non-GAAP financial measures are used by management in their financial and operating decision making because management believes they reflect the company's ongoing business in a manner that allows for meaningful period-to-period comparisons. Management also uses these non-GAAP financial measures when publicly providing the company's business outlook, for internal management purposes, and as a basis for evaluating potential acquisitions and dispositions. Management believes that these non-GAAP financial measures provide useful information to investors and others in understanding and evaluating Huron's current operating performance and future prospects in the same manner as management does, if they so choose, and in comparing in a consistent manner Huron's current financial results with Huron's past financial results. Investors should recognize that these non-GAAP financial measures might not be comparable to similarly titled measures of other companies. These measures should be considered in addition to, and not as a substitute for or superior to, any measure of performance, cash flows or liquidity prepared in accordance with accounting principles generally accepted in the United States.

Management has provided its outlook regarding adjusted EBITDA and adjusted diluted earnings per share, both of which are non-GAAP financial measures and exclude certain charges. Management has not reconciled these non-GAAP financial measures to the corresponding GAAP financial measures because guidance for the various reconciling items is not provided. Management is unable to provide guidance for these reconciling items because they cannot determine their probable significance, as certain items are outside of the company's control and cannot be reasonably predicted since these items could vary significantly from period to period. Accordingly, reconciliations to the corresponding GAAP financial measures are not available without unreasonable effort.

M&A is expected to continue to shape our growth trajectory through a programmatic strategy

Our M&A Focus

Portfolio Role	Strategic Play
 Core Growth	Expand core competitive advantage by adding new, tangential capabilities
 New Growth	Expand into net new markets or capabilities
 Acqui-hires	Execute group hires to bolster talent and credentials in key areas

Proven M&A Approach

- Well-defined enterprise and/or business unit strategy alignment
- Largely proprietary deal sourcing with some inbound pursuits
- Rigorous selection criteria spanning strategic, financial and cultural attributes
- Disciplined decision-making across management, industry and capability leadership, and corporate development with aligned incentives
- Strong governance led by the Finance and Capital Allocation Committee of the Board
- Well-established due diligence and integration process

Driven significant value for our shareholders

Focused on identifying high quality, low risk opportunities that drive returns well in excess of WACC

Expected to drive continue earnings growth

1. Refer to Huron's Annual Report on Form 10-K for the year ended December 31, 2025 for the definitions of the reconciling items.

2. 2021 free cash flow is adjusted for the impact of our Life Sciences divestiture, which excludes transaction-related employee and third-party costs, as well as estimated tax payments and net working capital adjustments.

3. 2021 adjusted free cash flow yield is lower than historical amounts, reflecting record low DSO as of December 31, 2020 and the pull forward of certain cash receipts into Q4 2020, the repayment in 2021 of 2020 FICA deferrals under the CARES ACT, and a DSO higher than our target of 60 days as of December 31, 2021 due to the impact of certain larger projects with extended contractual payment terms.
